

Pascal Tiberghien

Full Stack Developer · AI & LLM Engineering

pascaltib@gmail.com · linkedin.com/in/pascaltib · github.com/Pascaltib · Spain

SUMMARY

Full stack developer and startup generalist. Sole developer of two production AI SaaS products, Navar and KnowThyself360°, together over 165,000 lines of TypeScript and Svelte. Ships LLM systems in production: agentic tool calling, multi-model routing, MCP servers, evals and cost metering. Former CTO at Audemic. Also runs the commercial side at both startups: sales demos, customer onboarding, marketing and investor updates.

Grew up and lived in Colombia, USA, India, the Netherlands, and Austria; currently based in Spain.

PROFESSIONAL EXPERIENCE

Founding Engineer & Product Manager

January 2024 – Present

KnowThyself360°

United States · Remote

- Sole developer of an AI 360° feedback platform, around 113k lines of Svelte and TypeScript. Built the multi-stage LLM report pipeline (anonymization, theme extraction, narrative reports, blind-spot insights), Stripe billing, multi-week feedback workflows and an internal harness that benchmarks the pipeline across five models.
- Run sales demos, onboarding and support for B2B clients including an NHS trust. Handle pricing, paid campaigns, email deliverability and website copy.

Technologies: Svelte 5 · SvelteKit · TypeScript · Prisma · PostgreSQL (Neon) · Tailwind · Vercel AI SDK (Claude · GPT · Gemini) · Stripe · Inngest · Resend · ElevenLabs

Lead Developer

July 2023 – Present

Navar

Hamburg, Germany · Remote

- Sole engineer (950+ commits) of a B2B platform for AI-assisted business transformation: chat workspaces with live AI-edited documents, and “lenses”, AI advisors modeled on real experts or on the user’s own decision-making.
- Built the multi-model AI layer (Claude, GPT, Gemini) with provider failover, prompt caching and context-window management.
- Wrote an MCP server and an OAuth 2.1 authorization server so tools like Claude Code and Cursor can consult lenses directly.
- Added per-step cost tracking, credit metering and usage-based billing for agentic loops, plus durable background jobs and document ingestion.

Technologies: TypeScript · SvelteKit · Svelte 5 · Prisma · PostgreSQL (Neon) · Tailwind · Vercel AI SDK · MCP · OAuth 2.1 · Polar · Upstash Redis · Vercel

Chief Technology Officer & Full Stack Web Developer

March 2022 – March 2024

Audemic

Madrid, Spain

- Led development of the online web platform as a full stack developer and implemented the cloud architecture on AWS.
- Oversaw development of a production-grade machine learning NLP model.
- Built the Audemic Insights mobile app, owning the backend infrastructure and the React Native frontend.

Technologies: AWS · Machine Learning · NLP · React Native · Full Stack Development

Lead Developer

December 2021 – March 2022

Audemic

United Kingdom

- Led early-stage product development and technical architecture.

Technologies: JavaScript · React · Node.js · AWS

Web Development Teaching Assistant

Le Wagon

December 2021 – May 2022

Madrid, Spain

- Taught and supported students in full stack web development bootcamps.

Technologies: JavaScript · Ruby · Ruby on Rails · StimulusJS · Heroku · Sidekiq

SKILLS

AI & LLM Engineering	Agentic tool-calling systems, multi-model routing (Claude, GPT, Gemini), MCP servers, prompt caching, LLM evals & cost metering, RAG, vector databases
Languages & Frameworks	TypeScript, Svelte, SvelteKit, React.js, Ruby, Ruby on Rails, SQL
Tools & Infrastructure	Prisma ORM, PostgreSQL, AWS, Vercel, Stripe, OAuth 2.1, Tailwind CSS, Figma, Git, GitHub
Business	Product Management, Enterprise Sales & Demos, Customer Success, Marketing, Team Management

EDUCATION

Full Stack Web Developer, Computer Programming	2021
